

# FloatLift

Light years above outdated lift systems, Sunstream's industry leading hydraulic designs give you the aesthetics and reliability you desire and the high performance you deserve.

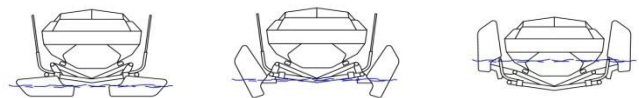

Sunstream's unique design lifts your boat from below. With no overhead structures or pilings to block your view, make your landscape your boat, not your boat lift.

It's fast. It's virtually unsinkable. It's safe and easy for the entire family to operate from the helm or dock with convenient remote control. The speed, portability, and view preserving qualities of the FloatLift make it an excellent choice over a piling cable lift, and the preferred lift of boaters and condominium associations across Florida.

Marina • Dock • Buoy • Anchor

*"I can't imagine boating without my Sunstream boat lift. I use my boat more often because it's as easy as taking my car out of the garage."*

- Foam-filled floats and high-speed hydraulics launch your boat in seconds.
- Because it ties like a boat and features solar or AC charging, use it or move it anywhere.
- Marine-grade aluminum construction with stainless steel fasteners make it ideal for use in fresh or salt water.
- Supporting to 15,000 pound capacities.
- Remote control operation from the helm or dock makes it easy and safer for all boaters
